Wireless Networking (The Morgan Kaufmann Series in Networking) Anurag Kumar, D. Manjunath, Joy Kuri

Over the past decade, the world has witnessed an explosion in the development and deployment of new wireless network technologies. From cellular mobile telephony to the ubiquitous "WiFi" networks in coffee-shops and airports, to the emerging WiMAX wireless broadband access networks, the menu of wireless access systems has become so comprehensive that wireline access to user devices may soon become a relic of the past. Wireless Networking serves as a one-stop view of cellular, WiFi, and WiMAX networks, as well as the emerging wireless ad hoc and sensor networks. Rather than provide descriptive accounts of these technologies and standards, the book emphasizes conceptual perspectives on the modeling, analysis, design and optimization of such networks. Furthermore, the authors present wireless networking within the unifying framework of resource allocation, using simple abstractions of the underlying physical wireless communication. In short, Wireless Networking is an in-depth, exhaustive, and invaluable asset to anyone working in this rapidly evolving field.

*Goes beyond descriptive and qualitative treatments, by presenting the foundations underlying the various wireless networking technologies

*Provides abstractions, models and analyses of established and emerging wireless networks, thereby supplying the reader with a conceptual and quantitative treatment, thus ensuring longevity of the learning from this material

*Aids comprehension by including over 120 figures, four appendices on the mathematics of the various models, several inline exercises, and extensive problem sets at the end of each chapter

From reader reviews:

Robert Ross:

Reading a book can be one of a lot of activity that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new facts. When you read a book you will get new information mainly because book is one of many ways to share the information as well as their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring one to imagine the story how the people do it anything. Third, you may share your knowledge to other folks. When you read this Wireless Networking (The Morgan Kaufmann Series in Networking), you could tells your family, friends in addition to soon about yours guide. Your knowledge can inspire the others, make them reading a reserve.

Robert Russell:

The book with title Wireless Networking (The Morgan Kaufmann Series in Networking) includes a lot of information that you can discover it. You can get a lot of gain after read this book. That book exist new information the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This kind of book will bring you in new era of the syndication. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Justin Belz:

Beside this Wireless Networking (The Morgan Kaufmann Series in Networking) in your phone, it might give you a way to get closer to the new knowledge or info. The information and the knowledge you may got here is fresh from the oven so don't become worry if you feel like an older people live in narrow village. It is good thing to have Wireless Networking (The Morgan Kaufmann Series in Networking) because this book offers for you readable information. Do you oftentimes have book but you do not get what it's exactly about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book along with read it from today!

John Parish:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from the book. Book is written or printed or outlined from each source in which filled update of news. Within this modern era like now, many ways to get information are available for a person. From media social like newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the Wireless Networking (The Morgan Kaufmann Series in Networking) when you essential it?
