An excerpt from the book:

Many of the top quarterbacks in the NFL share several common characteristics. These characteristics include an early affinity towards good leadership, an inward motivation to constantly improve, as well as raw throwing talent during their high school football careers. However, for two-time NFL MVP Aaron Rodgers, this was not the case. He was not even drafted by a Division One college out of high school. Despite this, Aaron's childhood life and high school football career definitely played a major role in making him the success that he is today.

Aaron Rodgers was born on December 2, 1983. He was born and raised in Chico, California and has one older and one younger brother. His father, Ed Rodgers, worked as a chiropractor. His father was a huge sports fanatic, and particularly loved football. Between 1973 and 1976, Ed played amateur football as an offensive lineman for the Chico State Wildcats.

A love of sports—primarily football—was part of the entire family culture. Aaron naturally grew passionate about football and began to love the sport at a very young age. He even enjoyed watching games with his father from the ripe young age of two. By the time Aaron was five, he was an avid collector of football cards and would memorize all of his favorite player’s statistics on the back.
