The second background report in the New Energy, New Geopolitics series, this report evaluates the geopolitical and national security impacts of the dramatic increase in the production of shale gas and light tight oil in the United States. It examines how the unconventional energy trend has already impacted U.S. national security and geopolitics and then posits several possible energy futures that could emerge from the unconventional revolution.

This report pairs with the original "New Energy, New Geopolitics" report and two other background reports, all available from Rowman & Littlefield:
