Special Report: Sustainable Development and the Control of Energy (The Growing Battle Over Smart Meters) Tom DeWeese

As the battle against the Smart Meters grows across the nation, Americans need to understand the issue, the dangers, the real reasons behind the government's drive to force them on angry and protesting homeowners, violating their property rights and endangering their health in the process. Smart Meters are designed to provide government with detailed information of your energy use, your movements in your home, the way you use your personal private time, and even how many people are in your home at any given time. It is an unconstitutional invasion of your home by government, as set down in the Fourth Amendment to the U.S. Constitution. The American Policy Center (APC), has produced a comprehensive special report entitled "Sustainable Development and the Control of Energy (The growing battle over Smart Meters)." This report details the real reasons behind the government's enforcement of the Smart Meters, the health and privacy violations, and the political agenda behind it all. This special report is available free at www.americanpolicy.org. I urge every concerned American to get a copy. Every American has a duty to preserve freedom by protesting and stopping the forced installation of these devises. - Tom DeWeese
