Rooted in Water: The Importance of Story to Ecopsychology and the Beginning of a Practice in Narrative Ecopsychology Tiffany A. Dedeaux

'Rooted in Water: The Importance of Story to Ecopsychology and the Beginning of a Practice in Narrative Ecopsychology' is a personal exploration into what unites us as one living world. While this is an inspired journey through history, heritage, and ideas, the intent is to look at how we expand who we are and what we see as possible. Most importantly, by including the indigenous story of the Gullah Geechee Nation, 'Rooted in Water' is a reminder...a plea...to tell your story so that future generations can have the opportunity to pay your wisdom forward while keeping the voice of the earth as an intentional part of the conversation.
