Conformal Mapping (Dover Books on Mathematics) Zeev Nehari, Mathematics

Conformal mapping is a field in which pure and applied mathematics are both involved. This book tries to bridge the gulf that many times divides these two disciplines by combining the theoretical and practical approaches to the subject. It will interest the pure mathematician, engineer, physicist, and applied mathematician.

The potential theory and complex function theory necessary for a full treatment of conformal mapping are developed in the first four chapters, so the reader needs no other text on complex variables. These chapters cover harmonic functions, analytic functions, the complex integral calculus, and families of analytic functions. Included here are discussions of Green's formula, the Poisson formula, the Cauchy-Riemann equations, Cauchy's theorem, the Laurent series, and the Residue theorem. The final three chapters consider in detail conformal mapping of simply-connected domains, mapping properties of special functions, and conformal mapping of multiply-connected domains. The coverage here includes such topics as the Schwarz lemma, the Riemann mapping theorem, the Schwarz-Christoffel formula, univalent functions, the kernel function, elliptic functions, univalent functions, the kernel function, elliptic functions, and bounded functions. There are many problems and exercises, making the book useful for both self-study and classroom use.

The author, former professor of mathematics at Carnegie-Mellon University, has designed the book as a semester's introduction to functions of a complex variable followed by a one-year graduate course in conformal mapping. The material is presented simply and clearly, and the only prerequisite is a good working knowledge of advanced calculus.

From reader reviews:

Joshua Johnson:

Have you spare time to get a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to typically the Mall. How about open as well as read a book entitled Conformal Mapping (Dover Books on Mathematics)? Maybe it is to get best activity for you. You understand beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with the opinion or you have additional opinion?

Lucille Chenier:

What do you regarding book? It is not important with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have time? What did you do? All people has many questions above. They need to answer that question simply because just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need that Conformal Mapping (Dover Books on Mathematics) to read.

Johanna Land:

Here thing why this specific Conformal Mapping (Dover Books on Mathematics) are different and reliable to be yours. First of all reading a book is good but it depends in the content than it which is the content is as yummy as food or not. Conformal Mapping (Dover Books on Mathematics) giving you information deeper including different ways, you can find any e-book out there but there is no book that similar with Conformal Mapping (Dover Books on Mathematics). It gives you thrill studying journey, its open up your eyes about the thing that happened in the world which is perhaps can be happened around you. You can easily bring everywhere like in recreation area, café, or even in your means home by train. If you are having difficulties in bringing the imprinted book maybe the form of Conformal Mapping (Dover Books on Mathematics) in e-book can be your alternative.

Bonnie Howe:

Within this era which is the greater man or who has ability to do something more are more important than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. One of several books in the top checklist in your reading list is Conformal Mapping (Dover Books on Mathematics). This book and that is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking way up and review this publication you can get many advantages.
