Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) Christoph Weber

Around the world, liberalization and privatization in the electricity industry have led to increased competition among utilities. At the same time, utilities are now exposed more than ever to risk and uncertainties, which they cannot pass on to their customers through price increases as in a regulated environment. Especially electricity-generating companies have to face volatile wholesale prices, fuel price uncertainty, limited long-term hedging possibilities and huge, to a large extent, sunk investments.

In this context, **Uncertainty in the Electric Power Industry: Methods and Models for Decision Support** aims at an integrative view on the decision problems that power companies have to tackle. It systematically examines the uncertainties power companies are facing and develops models to describe them - including an innovative approach combining fundamental and finance models for price modeling. The optimization of generation and trading portfolios under uncertainty is discussed with particular focus on CHP and is linked to risk management. Here the concept of integral earnings at risk is developed to provide a theoretically sound combination of value at risk and profit at risk approaches, adapted to real market structures and market liquidity. Also methods for supporting long-term investment decisions are presented: technology assessment based on experience curves and operation simulation for fuel cells and a real options approach with endogenous electricity prices.

From reader reviews:

William Vogt:

Reading a e-book can be one of a lot of action that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new information. When you read a book you will get new information since book is one of various ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you studying a book especially hype book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other folks. When you read this Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science), you are able to tells your family, friends along with soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a e-book.

Sherrie Smith:

As we know that book is important thing to add our knowledge for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated or blank sheet. Every year was exactly added. This reserve Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading any book. If you know how big benefit of a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you simply wanted.

Barbara Saddler:

Do you like reading a book? Confuse to looking for your favorite book? Or your book was rare? Why so many problem for the book? But just about any people feel that they enjoy regarding reading. Some people likes reading, not only science book and also novel and Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) or even others sources were given expertise for you. After you know how the truly amazing a book, you feel would like to read more and more. Science publication was created for teacher or even students especially. Those publications are helping them to increase their knowledge. In different case, beside science publication, any other book likes Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) to make your spare time considerably more colorful. Many types of book like this.

Bruno Reed:

A number of people said that they feel bored when they reading a guide. They are directly felt the idea when they get a half portions of the book. You can choose typically the book Uncertainty in the Electric Power

Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) to make your personal reading is interesting. Your skill of reading ability is developing when you similar to reading. Try to choose simple book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be 1st opinion for you to like to open up a book and read it. Beside that the book Uncertainty in the Electric Power Industry: Methods and Models for Decision Support (International Series in Operations Research & Management Science) can to be your new friend when you're truly feel alone and confuse with what must you're doing of these time.
