## Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence)

This book presents recent advances on the design of intelligent systems based on fuzzy logic, neural networks and nature-inspired optimization and their application in areas such as, intelligent control and robotics, pattern recognition, time series prediction and optimization of complex problems. The book is organized in eight main parts, which contain a group of papers around a similar subject. The first part consists of papers with the main theme of theoretical aspects of fuzzy logic, which basically consists of papers that propose new concepts and algorithms based on fuzzy systems. The second part contains papers with the main theme of neural networks theory, which are basically papers dealing with new concepts and algorithms in neural networks. The third part contains papers describing applications of neural networks in diverse areas, such as time series prediction and pattern recognition. The fourth part contains papers describing new nature-inspired optimization algorithms. The fifth part presents diverse applications of nature-inspired optimization algorithms. The sixth part contains papers describing new optimization algorithms. The seventh part contains papers describing applications of fuzzy logic in diverse areas, such as time series prediction and pattern recognition. Finally, the eighth part contains papers that present enhancements to meta-heuristics based on fuzzy logic techniques.

### **From reader reviews:**

#### **Gary Lane:**

Information is provisions for people to get better life, information currently can get by anyone in everywhere. The information can be a information or any news even restricted. What people must be consider if those information which is inside former life are challenging to be find than now is taking seriously which one works to believe or which one the resource are convinced. If you receive the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen within you if you take Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence) as the daily resource information.

#### **Maria Lacher:**

Do you have something that that suits you such as book? The e-book lovers usually prefer to select book like comic, short story and the biggest an example may be novel. Now, why not attempting Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence) that give your enjoyment preference will be satisfied through reading this book. Reading behavior all over the world can be said as the way for people to know world a great deal better then how they react towards the world. It can't be mentioned constantly that reading addiction only for the geeky person but for all of you who wants to end up being success person. So , for every you who want to start reading as your good habit, you can pick Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence) become your current starter.

#### **Stacey Thompson:**

Are you kind of hectic person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are having problem with the book when compared with can satisfy your short period of time to read it because all of this time you only find publication that need more time to be examine. Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence) can be your answer mainly because it can be read by you who have those short free time problems.

#### **James Voyles:**

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information from your book. Book is created or printed or outlined from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for you actually. From media social including newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just

searching for the Design of Intelligent Systems Based on Fuzzy Logic, Neural Networks and Nature-Inspired Optimization (Studies in Computational Intelligence) when you required it?
