Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence)

Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence)

Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence)

Information and communication technology, in particular artificial intelligence, can be used to support economy and commerce using digital means. This book is about agents and multi-agent distributed systems applied to digital economy and e-commerce to meet, improve, and overcome challenges in the digital economy and e-commerce sphere. Agent and multi-agent solutions are applied in implementing real-life, exciting developments associated with the need to eliminate problems of distributed systems.

The book presents solutions for both technology and applications, illustrating the possible uses of agents in the enterprise domain, covering design and analytic methods, needed to provide a solid foundation required for practical systems. More specifically, the book provides solutions for the digital economy, e-sourcing clusters in network economy, and knowledge exchange between agents applicable to online trading agents, and security solutions to both digital economy and e-commerce. Furthermore, it offers solutions for e-commerce, such as, mapping and alignment of ontologies for business, negotiation, automated auctions, recommender systems to support traders in business activities, and game simulations.

From reader reviews:

Kai Martin:

What do you think of book? It is just for students because they're still students or the idea for all people in the world, exactly what the best subject for that? Only you can be answered for that issue above. Every person has different personality and hobby for each other. Don't to be obligated someone or something that they don't want do that. You must know how great in addition to important the book Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence). All type of book could you see on many methods. You can look for the internet options or other social media.

Michael Ramsey:

As people who live in typically the modest era should be change about what going on or info even knowledge to make them keep up with the era and that is always change and move ahead. Some of you maybe may update themselves by looking at books. It is a good choice for you but the problems coming to a person is you don't know which you should start with. This Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and wish in this era.

Tara Payton:

The ability that you get from Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) is a more deep you looking the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to comprehend but Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) giving you enjoyment feeling of reading. The article author conveys their point in certain way that can be understood through anyone who read it because the author of this publication is well-known enough. This kind of book also makes your own vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We propose you for having this specific Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce (Studies in Computational Intelligence) instantly.

Sherry Fitzgerald:

In this time globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The book that recommended to your account is Agent and Multi-Agent Systems in Distributed Systems - Digital Economy

and E-Commerce (Studies in Computational Intelligence) this e-book consist a lot of the information on the condition of this world now. This particular book was represented just how can the world has grown up. The words styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. That's why this book appropriate all of you.
