Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials)

Alexei V. Finkelstein, Oleg Ptitsyn

Protein Physics is a lively presentation of the most general problems of protein structure, folding and function from the physics and chemistry perspective, based on lectures given by the authors. It deals with fibrous, membrane and, most of all, with the best studied water-soluble globular proteins, in both their native and denatured states. The major aspects of protein physics are covered systematically, physico-chemical properties of polypeptide chains; their secondary structures; tertiary structures of proteins and their classification; conformational transitions in protein molecules and their folding; intermediates of protein folding; folding nuclei; physical backgrounds of coding the protein structures by their amino acid sequences and protein functions in relation to the protein structure. The book will be of interest to undergraduate and graduate level students and researchers of biophysics, biochemistry, biology and material science.

- * Designed for a wide audience of undergraduate and graduate students, as well as being a reference for researchers in academia and industry
- * Covers the most general problems of protein structure, folding, and function and introduces the key concepts and theories
- * Deals with fibrous, membrane and especially water-soluble globular proteins, in both their native and denatured states
- * Summarizes and presents in a systematic form the results of several decades of world wide fundamental research on protein physics, structure and folding
- * Examines experimental data on protein structure in the post-genome era

From reader reviews:

Lillian Owensby:

What do you about book? It is not important with you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy man? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They need to answer that question since just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need that Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials) to read.

Kevin Caputo:

As people who live in the particular modest era should be change about what going on or information even knowledge to make all of them keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by reading books. It is a good choice for you personally but the problems coming to anyone is you don't know what kind you should start with. This Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials) is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Bryon Diaz:

Now a day people who Living in the era just where everything reachable by talk with the internet and the resources in it can be true or not call for people to be aware of each data they get. How people have to be smart in getting any information nowadays? Of course the solution is reading a book. Examining a book can help people out of this uncertainty Information specially this Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials) book because book offers you rich data and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Helen Christopher:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or their very own friends. Usually they undertaking activity like watching television, likely to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Might be reading a book might be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try look for book, may be the guide untitled Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials) can be great book to read. May be it may be best activity to you.
