Extending Web Services Technologies: The Use of Multi-Agent Approaches (Multiagent Systems, Artificial Societies, and Simulated Organizations)

Extending Web Services Technologies: The Use of Multi-Agent Approaches (Multiagent Systems, Artificial Societies, and Simulated Organizations)

Extending Web Services Technologies addresses the rapidly growing impact of Multi-Agent Systems on web services tools and techniques. In particular, the book addresses the potential for MAS techniques to impact the difficult challenges that must be tackled for web services technology to realize its promises. The area of web services offers the multi-agent community exciting research possibilities, including similarities in system architectures, powerful tools, and a focus on issues such as trust and reliability. Likewise, techniques developed in the multi-agent research community promise to have a strong impact on this fast growing technology.

The contents contain contributions by leading international researchers and professionals from both the web services and Multi-Agent Systems community. Topics include semantic web services and associated standards, architectures integrating agents and services, transactions, authorization, and service composition.

From reader reviews:

James Benavidez:

Information is provisions for individuals to get better life, information currently can get by anyone on everywhere. The information can be a know-how or any news even a huge concern. What people must be consider while those information which is from the former life are difficult to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Extending Web Services Technologies: The Use of Multi-Agent Approaches (Multiagent Systems, Artificial Societies, and Simulated Organizations) as your daily resource information.

Jonathan Peterson:

Reading a guide tends to be new life style in this era globalization. With reading you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their very own reader with their story or perhaps their experience. Not only the storyplot that share in the books. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their talent in writing, they also doing some analysis before they write on their book. One of them is this Extending Web Services Technologies: The Use of Multi-Agent Approaches (Multiagent Systems, Artificial Societies, and Simulated Organizations).

Donna Solano:
